*I choose to risk my significance; to live so that which came to me as seed goes to the next
as blossom, and that which came to me as blossom goes on as fruit.*
-Dawna Markova

All winter, seeds have been lying dormant and are now germinating. What are the seeds of your own heart's longing? What has been sleeping, dreaming, waiting to be cracked open by the fire of new life?

Join us in a place of wild beauty. With a new moon and the arriving of spring, our day outdoors is an opportunity for inspiration and renewal. It may be a potent time to mark what has died with winter and what new vision is wanting to be birthed.

Our small group format will include time for sharing in council and about 3 hours of solo time on the land. We will end the day with a story council that will include some reflection from your guides.
